

HE!

Every day species are going extinct around the world. Five or thousands of animals are killed due to plastic in the sea. Over 115 million animals are killed in laboratory experiments chemical, drug, food and cosmetic testing every year. More than 100 animals are killed by hunters.

Wildlife Help!

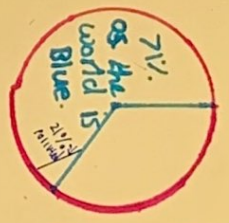

Similarly, many native species including marine mammals, sea turtles and seabirds are also on the edge of extinction as climate change and overfishing become a major threat to their existence. According to the International Union for Conservation of Nature (IUCN), hundreds of marine species across the world come under

did you know that a 100 million sea animals have been killed

Over 115 million animals are killed in laboratory experiments world wide. Sea animals, drugs, food and cosmetic testing every year. By giving it help, we can help in this situation. All we have to do is to protect it. Big value every year time to help or plastic could help.
